

## Logitech C920 HD Pro Webcam

### Kit Includes

- Logitech C920 HD Pro Webcam
- Camera stand

### Instructions for Use

1. Plug in the webcam to your computer
2. Open CI Badge
3. Click "Settings" at the bottom of the CI Badge entry screen
4. In the settings menu bar click the "Pictures" tab
5. At the bottom of the page make sure the "Select Method of Picture Capture" button is set to "Live Video"
6. Click the "Set Up" button
7. Click the "Disconnect" button. This will disconnect the integrated computer camera
8. Under "Available Video Devices" select your webcam from the drop-down
9. Then click the "Connect" button
10. Under "Video Stream", if the resolution is not automatically selected, click on the drop-down and select "640x360 @24bit (MJPG)"
11. Click the "Test Picture Capture" button. A dialog box should appear stating that the image was captured successfully. Click "Ok".
12. Click the "Exit and Save" button
13. Return to the main entry screen to start taking photos using your webcam

**NOTE:** You will need to follow the same steps for each personality
